

MANIFESTO

Igniting Change in the ClimateTech Sector

TALENT WITH PURPOSE

4zero are the first certified B Corp™ Staffing Agency for the ClimateTech sector.

We believe that technology is key in driving the transformative change required to mitigate climate change.

It's genesis is an individual, with an idea, motivated to use their **technical expertise towards crafting a solution** to a climate challenge and who is bold enough to think they can make a difference.

The idea attracts other like-minded individuals, **united in a desire to make an impact.** This gathers momentum and becomes a company, which in turn becomes a movement.

That's why we started this. **We seek to partner with the change makers driven by more than just personal gain.** The ones that could have chosen any field but chose to focus their effort into answering the climate conundrum.

We support the good folks, on the right side of history, actively contributing towards being part of the solution and not further magnifying the problem.

Unapologetically Authentic.

Purpose Driven.

Community Led.

Committed to Sustainable Best Practice.
